## FIRE DRILL - EMERGENCY EVACUATION EXERCISE

On 20 July 2017, K-One conducted a fire drill emergency evacuation exercise at our Ipoh Manufacturing Center involving all our staff.

The main objective of this exercise is to:

- Create staff awareness, alertness and readiness to act during emergency;
- Provide essential knowledge and training for employees to stay composed and know what to do in the event of a fire; and
- Test adequacy of alarm system and PA announcement in all areas.

*Staff gathers at assembly area. Nothing could be more important than the safety and security of our staff*

The Emergency Response Team (ERT) sprang into action, checking all areas to evacuate all staff out of the plant and towards the designated assembly points.

Overall, this exercise was successfully conducted with full co-operation from all K-One employees. K-One is equipped and stands ready to face the unlikely event of a fire.

*Staff volunteers to try out the fire extinguisher*

*A 'victim' being rescued by the Evacuation Unit*

First Aid Team examined severity of 'victim's' condition

Staffs trying to figure out correct way to use fire extinguisher
